📁 PROFESSIONAL EXPERIENCE

Freelancer - AI / Software Engineering

Self-employed

02/2026 - now

Prague, Czech Republic

- AI consulting and implementation - from strategy and architecture through to systems running in production: LLM agents, RAG and multimodal GenAI. Alongside that, custom software development: web apps, mobile apps, browser extensions and web design.

Lead AI Developer

LEDVANCE

10/2025 - 02/2026

Prague, Czech Republic

- Spearheaded the Architecture and Planned Launch of a comprehensive Marketing AI Platform, enabling automated content generation across various business units.
- Led Multimodal GenAI Integration, implementing cutting-edge models for image, video, and text generation to streamline creative workflows and reduce production costs.
- Engineered Enterprise-Grade Chatbot Solutions, focusing on sophisticated RAG (Retrieval-Augmented Generation) architectures to improve internal knowledge access and customer interaction.

Software/AI Engineer

Stats Perform

01/2023 - 09/2025

Prague, Czech Republic

- Development and Ongoing Enhancement of Text and Vision LLM Applications (Open Source/Bedrock/Deepseek/Gemini)
- Research and implementation of latest trends such as Agentic AI, MCP, AI Coding, etc.
- Testing of Cloud (AWS) and on-premise based services with Jenkins and dockerised applications
- Performance and load testing as well as Test Automation of Backend, Frontend and Rest APIs with Postman, Node.js, Python and Cypress
